HOUSEHOLD TIP – SORTING WASHING CORRECTLY:

Don't sort worn clothes in just one laundry basket but use several baskets for pre-sorting – e.g. into light, coloured, sensitive and 60° or 95° washing.

Washing machine and tumble dryer in easy reach.

Everything completely relaxed. These appliances too in the utility room are positioned at an ergonomic height. A number of practical solutions are also available, such as the drawer for the laundry basket which eliminates the bother of having to bend down and helps to take some of the effort out of housekeeping.

Sorting and planning the washing more easily.

The laundry sorting unit with its drawers sorts washing into coloured, white and 95°-wash items almost automatically – even when closed thanks to the practical openings in the front.

Generously sized hanging cubicle.

Can take a lot: a coat rack integrated in the utility room, for example, lends itself to storing work clothes. A neat solution. Particularly when cloths are dirty. There's also plenty of space here for your summer or winter clothing when it's not needed.

Multi-sorted.

The practical pull-out systems come with ample space for cleanly and accurately sorting waste – providing the ideal basis for successful recycling and sustainable house-keeping.

Keeping beverages in easy reach.

The larger unit for beverages keeps everything in immediate reach because the various crates are clearly set out and open. This way, you can take out bottles and put empties back without having to juggle around with crates.

Clean, neat and tidy.

Various holders in the broom cupboard ensure that everything is kept in the right place – letting you put your hand on whichever household appliance you happen to need. And also everything else you need for cleaning, sweeping, ironing or vacuuming.
